What NETWORK STATION can offer you

Multi-Venue Architecture
SICE NETWORK STATION is designed for Multiple Venues and Management Levels. From estate/resellers level admin users, to individual managers or reception staff – you decide.

Fair Traffic Shaping
SICE NETWORK STATION enables limiting guests to a defined amount of bandwidth or time, ensuring equally-distributed access.

White Label Platform
We offer a white label platform, providing you with the opportunity to grow your own portfolio of WiFi venues from small Cafes and Pubs to large Hotel Chains.

Client Surveys and Quizzes
Create surveys, quizzes and tests with just a few clicks. Obtain clients feedback and react on these immediately. Whether you are testing client satisfaction or launching a new product.

Network & AP Monitoring
Monitor your network infrastructure such as access points and routers directly from your SICE NETWORK STATION portal enabling you to have live visibility of your network health.

GPS Tracking
Enable GPS tracking and track the location of your mobile WiFi networks, increasing opportunities: trains, boats, planes, buses, vessels, ships, and cruise liners.

Mobile Optimisation
SICE NETWORK STATION automatically detects if the client is connected from a mobile, laptop or desktop device and the Welcome Portal adapts to any device, displaying the optimum resolution.

Advertising
Promote businesses and services on your customers devices. The unique advertising feature enables you to captivate guests with dramatic full-page ads or videos, with a range of ad formats.

Social Login
Clients can register and connect to the internet through any of their favourite social networks (Facebook, Twitter, Google, LinkedIn, Instagram, Amazon). Invite users to click "Like" or "Follow" after login and publish your brand on their timeline.

PMS Integration
SICE NETWORK STATION can be integrated with many Property Management Systems (PMS) allowing users to login and automate billing to their account.

Branded Login Page
Marketing your venue with your brand identity promotes your business. SICE NETWORK STATION provides you with a fully integrated platform to create and manage your custom branded login pages.

Built-in Payment Gateways
The platform supports the most common Payment Gateways including PayPal, Mollie, Authorize.net, PayFast, eWay, PesaPal, MPesa, Payment Express, PayU Biz and PaySafe.

Vouchers
Voucher code access can be enabled to allow your guests to be connected in seconds. Vouchers can be customised to include your branding in addition to network policies such as speed, duration and data allowance.

Network Station Printer
The integrated NETWORK STATION Printer is the ideal device if you want something quick, easy, ready-to-go and reliable. Just one click to print a card or a voucher.

Social Login
One click connection

Often guests are willing to share their information in exchange for a fast login. This trend is a business opportunity. One click connection via any of their favourite social networks **(Facebook, Google, Twitter, LinkedIn, Instagram, Amazon, VKontakte or a custom authentication system that uses OAuth or OpenID).**
Integration with Microsoft Active Directory (LDAP).

NETWORK STATION works with the infrastructure you have in place

Turn your WiFi into business

Advertising with SMS

Advertising enables you to promote to millions of people and grow your business with advertising across devices, where people enjoy their WiFi connection.

Ads are fully responsive and influence users while they are connecting to free sponsored WiFi or 4G network.
