cnMaestro™ X Management System

Key Functionalities

- **Zero-touch provisioning:** Create, provision, monitor and manage the entire network of wireless and wired devices from a single dashboard login with key performance metrics, alarms, and alerts. The cloud-first UI design is easy to learn and apply across the portfolio and helps network administrators simplify operations and deliver an optimal client experience.
- **With centralized visibility and control for Cambium Networks' wireless and wired products,** network administrators can quickly and easily deploy networks with minimal training. Whether you work on small sites or large distributed networks with thousands of sites, cnMaestro makes deployment and operations easy. Administrators have access to information needed to enforce policies and optimize performance. Remote support capability is integrated into the architecture, along with powerful help desk tools to debug remote issues without going onsite. Troubleshooting tools such as ping, traceroute, throughput, and live packet captures are included, dramatically reducing resolution times and enabling remote troubleshooting.
- **Deployment flexibility and TCO:** Choice of public cloud, private cloud, or on-premises deployment with best TCO. cnMaestro helps reduce operating costs and accelerate return on investment. cnMaestro does not require Wi-Fi controllers, thereby reducing the complexity and cost of deploying Wi-Fi networks.
- **Built for scale and security at all levels:** Devices connect to cnMaestro Cloud using SSL-enabling deployments without changes to the firewall configuration. Cambium Intelligent edge architecture enables fault-tolerant networks where the network continues to operate even when the cloud is unreachable due to a WAN outage. With cnMaestro X, you can manage networks with up to thousands of sites, and up to 25,000 devices.
- **Tailored views for enterprise, access and backhaul, and IIoT:** The access and backhaul view provides visualization and control of devices from service provider towers to the network edge.
- **Supports network hierarchy,** enabling easy configuration, monitoring, and debugging at network nodes to reduce operational costs. This is especially critical for large networks or small distributed networks with small on-site IT staff.
- **Provides a bird's-eye view of network health** with insights on performance, connectivity, and client experience. Administrators can quickly identify potential trouble spots and drill down from network to client-level details.
- **Extensible platform for managing third-party endpoints.**
- **cnMaestro X supports the following Cambium solutions:**
 - » **Wi-Fi 6/6E/7 Access Points (APs)**
 - » **cnPilot™ E-series and R-series APs**

*cnMatrix Switches and Wi-Fi APs:

These products use model-based SKUs for subscription.

For Wi-Fi access points, the corresponding cnMaestro X SKU follows a specific format:

The base part of the SKU will be ""MSX-SUB-"" followed by the model name of the access point (e.g., XV2-21X).

The ending part will be ""-1/3/5"", indicating the subscription term duration (1, 3, or 5 years).

Similarly, for cnMatrix switches, the cnMaestro X SKU follows the same format based on the switch model name (e.g., EX3024F)

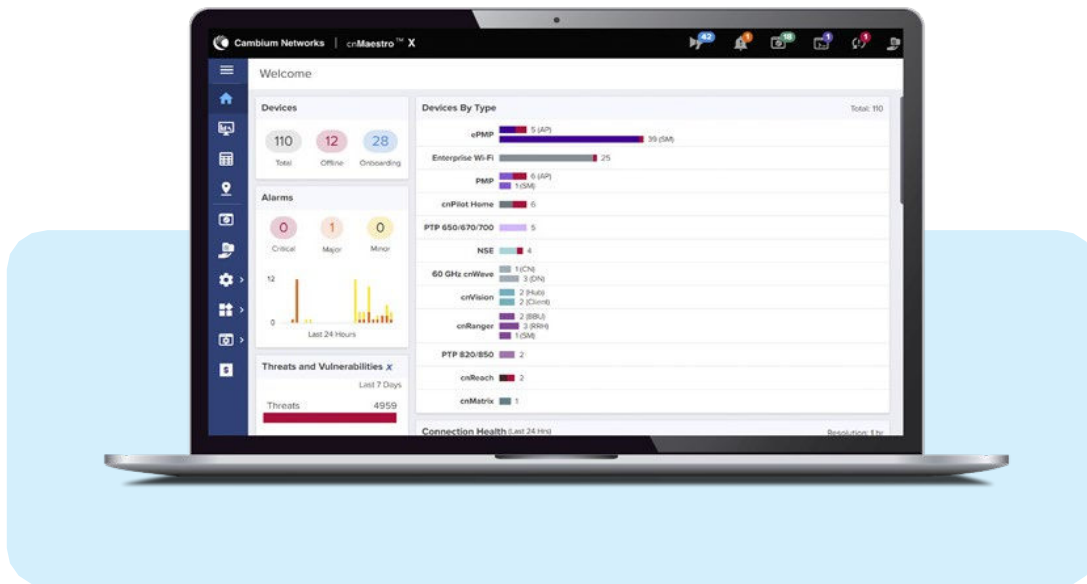

For example:

The SKU for 3-year cnMaestro X subscription for XV2-21X AP and a 5-year cnMaestro X subscription for an EX3024F switch would be:

SKU	Description
MSX-SUB-XV2-21X-3	cnMaestro X for one XV2-21X AP. Creates one Device Tier3 slot. Includes Cambium Care Pro support. 3-year subscription
MSX-SUB-EX3024F-5	cnMaestro X for one EX3024F. Creates one Device Tier20 slot. Includes Cambium Care Pro support. 5-year subscription

** Unlike other products, NSE3000 & RV22 devices need a subscription to be used on either cnMaestro X or cnMaestro Essentials.
